Report Highlights

Waverly Central School District

Audit Objective

Determine whether the Waverly Central School District (District) used District resources to provide the mental health component of the New York Safe Schools Against Violence in Education Act (SAVE Act) training requirement to staff.

Key Finding

The District did not provide mental health training as required to any staff for the 2020-21 school year by September 15, 2020 because officials were unaware of the mental health training requirement.

Key Recommendation

Provide mental health training to all staff and ensure it is completed by September 15, as required. Such training should address recognition of the warning signs, whom to turn to for assistance, and how to access appropriate services.

District officials agreed with our recommendation and indicated they would take corrective action but did not formally respond in writing to our audit findings.

Background

The District is located in Chemung and Tioga Counties, and is governed by an elected nine-member Board of Education (Board).

The Board is responsible for the general management of the District.

The Superintendent serves at the Board's direction and is responsible for day-to-day management.

The Superintendent is the Chief Emergency Officer and is responsible for coordinating emergency plan training for staff.

Quick Facts

2020-2021 School Year

Staff	401
Students	1,490
School Buildings	3

Audit Period

July 1, 2020 – June 30, 2021

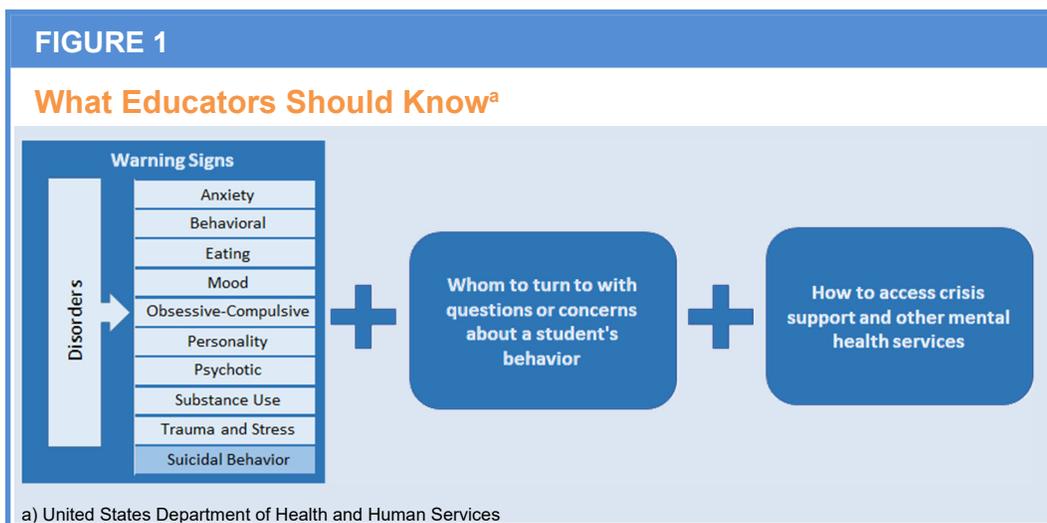

Mental Health Training

The SAVE Act was introduced to help improve school safety. The SAVE Act requires school districts to develop a comprehensive district-wide school safety plan (safety plan) that addresses crisis intervention, emergency responses and management. The safety plan developed by each district must include, among other things, policies and procedures for annual school safety training for staff and students. School districts must certify to the New York State Education Department (SED) Commissioner that all staff have undergone the school safety training, which must include a component on mental health.¹ SED requires that the certification to the SED Commissioner states that all staff have undergone the annual training by September 15 of each year.

What Is the Mental Health Component of the SAVE Act Training for All Staff?

The SAVE Act requires all districts to provide staff annual emergency response plan training with a component on mental health. School personnel are often the first to notice mental health problems, and, to support the mental health of a district's students.

While the SAVE Act and SED requirements state that the annual school safety training must include a component on mental health, neither the SAVE Act nor SED requirements directly address what topics should be included within the mental health training component. Rather, SED issued guidance to all school districts that included resources relating to mental health. Included within the resources was information from the U.S. Department of Health and Human Services (DHHS) addressing “what educators should know” regarding warning signs of mental health problems, “whom to turn to,” and “how to access crisis support and other mental health services” (Figure 1).

¹ 8 NYCRR Section 155.17[c][1][xiii]

Based on SED guidance, as a best practice, at a minimum staff should be trained on the DHHS recommended mental health components of “what educators should know.”

District Training Did Not Include Mental Health Components

The Superintendent certified to SED that all staff received training on the emergency response plan on September 1, 2020, which must also include training on a component of mental health.

The Superintendent told us the staff training did not include the recommended components of mental health, because he was unaware of the mental health requirement. The Superintendent also told us there is a lack of SED guidance on required training content.

It is imperative, especially during the COVID-19 pandemic, that staff be provided training on warning signs that may be an early indicator of mental health issues and concerns. Training staff can assist in identifying mental health issues in students early on to get help when needed and potentially avoid having to react to crisis situations or emergencies.

What Do We Recommend?

District officials must:

1. Provide mental health training to all staff and ensure it is completed by September 15, as required. Such training should address recognition of the warning signs, whom to turn to for assistance, and how to access appropriate services.

Appendix A: Audit Methodology and Standards

We conducted this audit pursuant to Article V, Section 1 of the State Constitution and the State Comptroller's authority as set forth in Article 3 of the New York State General Municipal Law. To accomplish our audit objective and obtain relevant audit evidence, our procedures included the following steps:

- We selected the District for audit using a random number generator applied to a list of districts, broken out by five geographic regions (excluding NYC schools), not currently in the OSC audit process at the time of selection. The list was broken out by geographic region for an even representation of school districts across the State for this multi-unit audit.
- We interviewed District officials to gain an understanding of the process for creating, disseminating and monitoring mental health training for staff.
- We reviewed relevant State laws and regulations, and guidance from SED and the DHHS. We reviewed District policies to gain an understanding of required mental health training.
- We reviewed Board minutes for the 2020-21 school year to determine the Board action taken related to the District-wide safety plan or required mental health training.
- We requested and reviewed records supporting the District's 2020-21 certification to SED that required annual training with a component of mental health were provided to staff.
- We determined the total number of individuals employed by the District during our audit period by obtaining and reviewing an employee listing.

We conducted this performance audit in accordance with generally accepted government auditing standards (GAGAS). Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objective. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objective.

The Board has the responsibility to initiate corrective action. A written corrective action plan (CAP) that addresses the findings and recommendations in this report must be prepared and provided to our office within 90 days, pursuant to Section 35 of General Municipal Law, Section 2116-a (3)(c) of New York State Education Law and Section 170.12 of the Regulations of the Commissioner of Education. To the extent practicable, implementation of the CAP must begin by the end of the fiscal year. For more information on preparing and filing your CAP, please refer to our brochure, *Responding to an OSC Audit Report*, which you received with the draft audit report. The CAP should be posted on the District's website for public review.
