# School Districts Accounting and Reporting Manual

#### Updated August 2019 to reflect:

Accounting Bulletin (issued June 2019) - Account Codes for ERS & TRS Reserve Contributions - Code names changed/added in the Appendix.

Accounting Bulletin (issued July 2018) - Accounting and Financial Reporting for Other Postemployment Benefits as Required by GASB Statement 75 - Code name changed in the Appendix.

Accounting Bulletin (revised May 2017) - Accounting and Financial Reporting for Pensions as Required by GASB 68 and Updated by GASB 82 - Code names added in the Appendix.

Journal entry to record the use of interfund monies to pay closing costs in an advanced refunding – Journal entry 146b in Chapter 8.

Added codes for Transportation for Foster Students, Program for English Language Learners and Security of Plant.

# Part I - Accounting and Reporting Chapter 1 - Introduction

The Office of the State Comptroller (OSC) has compiled this manual as a comprehensive accounting/ reporting guide for school district officials and others interested in accounting by school districts in New York State. It provides an overview of generally accepted governmental accounting and financial reporting principles, and OSC's interpretations of such principles, where pronouncements are silent or do not address problems common among school districts within New York State.

The basic responsibility for oversight of school districts by the State Comptroller is contained in the State Constitution and Article 3 of the General Municipal Law (GML). Among other things, the State Comptroller's responsibilities include: performing audits (GML, Sections 33, 34, 35), prescribing information to be included in annual financial reports (GML, Sections 30, 31, 32), prescribing a uniform system of accounts (GML, Section 36), and preparing an annual report to the State Legislature (GML, Section 37).

OSC has made a commitment to prescribe an accounting system which conforms to Generally Accepted Accounting Principles (GAAP). OSC prescribes a Uniform Systems of Accounts pursuant to GML, Section 36. The System of Accounts provides for a standard chart of accounts and fund structure that is the basis for the annual financial reports (ST-3) required to be filed with the State Education Department (SED) and the State Comptroller. For additional information, please see the SED website at www.p12.nysed.gov/mgtserv/.

# **Generally Accepted Accounting Principles for Governmental Units**

Generally Accepted Accounting Principles (GAAP) are uniform minimum standards of and guidelines to financial accounting and reporting. They are the framework within which financial transactions are recorded and reported resulting in financial statements that provide comparability between governmental entities, consistency between accounting periods and reliability for internal and external users of financial statements.

Since GAAP for local governments is not static but evolving, OSC is involved in such activities as monitoring and responding to proposed pronouncements; amending the Accounting Systems when appropriate in light of new or revised standards; and assisting local officials in understanding and implementing GAAP through conferences, workshops and seminars. This updated manual is an example of this activity.

A brief overview of the history of standard setting for private enterprises and for government is helpful in understanding the sources of GAAP for governments. The first formal efforts to establish GAAP for private enterprises began in 1930 in response to the financial difficulties experienced during the Great Depression. Over the years, the American Institute of Certified Public Accountants (AICPA) established GAAP. In 1973, the Financial Accounting Standards Board (FASB) was formed. Since 1973, FASB has prescribed GAAP for commercial and non-profit organizations. FASB operates under the auspices of the Financial Accounting Foundation (FAF), an independent non-profit foundation.

GAAP for state and local governments were originally sponsored by the Municipal Finance Officers Association (MFOA), now known as the Government Finance Officers Association (GFOA), through a group known as the National Committee on Municipal Accounting (NCMA). After some years, this committee was replaced by another MFOA-sponsored group, the National Committee on Governmental Accounting, which itself was eventually expanded and renamed the National Council on Governmental Accounting (NCGA). The MFOA's guidance was incorporated into various editions of a publication that came to be known commonly as the "blue book." The first edition was published in 1934. The third edition published in 1968 inaugurated the format still used today in the current edition. In 1974, the AICPA issued their accounting and auditing guide, Audits of State and Local Governmental Units (ASLGU), which stated that the AICPA deemed the 1968 Blue Book to be GAAP for governmental units. In the late 1970's, partly in response to the fiscal crisis in New York City and several other cities, the NCGA began to issue statements and interpretations. Eventually, the NCGA decided that these pronouncements, rather than the blue book, should be authoritative. Consequently, later editions of the blue book are not GAAP, but merely illustrate what is common practice. As mentioned earlier, private-sector standard setting was eventually transferred from the AICPA to the FAF. Developments in the public sector took a very similar course. In 1984, the responsibility of setting GAAP for state and local governments was transferred from the NCGA to the Governmental Accounting Standards Board (GASB). Like the FASB, the GASB functions under the auspices of the FAF.

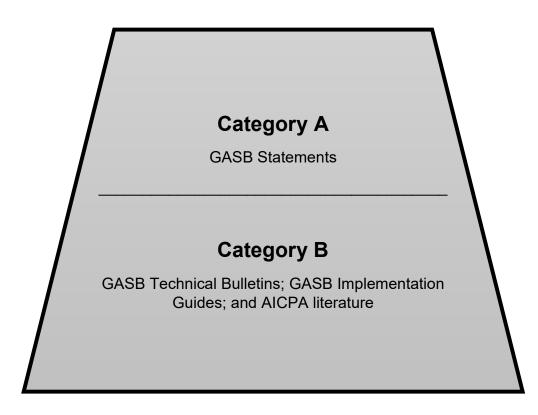

In short, the following have been the standard setting bodies for GAAP for state and local governments:

| National Committee on Municipal Accounting    | 1934-1948    |
|---|--------------|
| National Committee on Governmental Accounting | 1948-1974    |
| National Council on Governmental Accounting   | 1974-1984    |
| Governmental Accounting Standards Board       | 1984-Present |

The GASB is the highest, but not the sole, source of GAAP for state and local governments. When accounting issues are not covered by GASB guidance, guidance from the American Institute of CPAs (AICPA), Government Finance Officers Association (GFOA), the Financial Accounting Standards Board (FASB) and other sources is used following a prescribed order.

The following is the "hierarchy" of GAAP, as identified in GASB Statement No. 76, The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments:

# **GAAP Hierarchy**

#### **Category A**

All GASB Interpretations previously issued and currently in effect are considered included in Category A. These interpretations apply until altered, amended, supplemented, revoked or superseded by subsequent GASB pronouncements.

Category A standards are the subject of the Accounting Principles Rule of the AICPA Code of Professional Conduct.

#### **Category B**

Authoritative material from GASB Implementation Guides is incorporated periodically into the Comprehensive Implementation Guide and still retains its authoritative status.

The AICPA literature must be specifically made applicable to state and local governmental entities and contain a statement that indicates that it has been cleared by the GASB in accordance with the GASB's Rules of Procedure.

# **Chapter 2 - Basic Governmental Accounting Principles**

## **GOVERNMENTAL ACCOUNTING PRINCIPLES**

The following are basic principles of accounting and reporting applicable to fund based accounting for school districts as integrated in the GASB Codification of Governmental Accounting and Financial Reporting Standards.

- 1. Accounting and Reporting Capabilities
- 2. Fund Accounting Systems
- 3. Fund Types
- 4. Number of Funds
- 5. Reporting Capital Assets
- 6. Valuation of Capital Assets
- 7. Depreciation of Capital Assets
- 8. Reporting Long Term Liabilities
- 9. Measurement Focus and Basis of Accounting
- 10. Budgeting, Budgetary Control and Budgetary Reporting
- 11. Transfer, Revenue, and Expenditure Account Classification
- 12. Common Terminology and Classification
- 13. Interim and Annual Financial Reports

| 1. Accounting and Reporting Capabilities  |   |
|---|---|
| Purpose   | Explains the requirements for accounting records and reporting  |
|   | A governmental accounting system must make it possible both:  |
| Principle   | (a) to present fairly and with full disclosure the funds and activities of the governmental unit in conformity with generally accepted accounting principles; and |
|   | (b) to determine and demonstrate compliance with finance-related legal and contractual provisions.  |
| In New York State there are few, if any, provisions of general statutory law that conflict with GAAP. |   |
| However, if conf  | lict does exist, financial statements must be prepared in conformance with GAAP. This does  |

However, if conflict does exist, financial statements must be prepared in conformance with GAAP. This does not mean that two accounting systems should be maintained. Books of account should be maintained on a legal-compliance basis, but should include sufficient additional reports to permit GAAP-based reporting.

| 2. Fund Accounting Systems |  |
|----------------------------|--|
| Purpose                    | Explains funds and their structure   |
| Principle                  | Governmental accounting systems should be organized and operated on a fund basis.<br>A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts<br>recording cash and other financial resources, together with all related liabilities and<br>residual equities or balances and changes therein, which are segregated for the purpose<br>of carrying on specific activities or attaining certain objectives in accordance with special<br>regulations, restrictions or limitations. |

|   | 3. Fund Types  |  |
|---|--|--|
| Purpose   | Explains the types of funds  |  |
| Principle   | For school districts, there are two categories of funds used in governmental accounting: Governmental Funds and Fiduciary Funds. |  |
| Governmental F  | Governmental Funds account for most governmental functions.  |  |
| The General   | Fund accounts for all financial resources except those accounted for in another fund.  |  |
| <b>Special Revenue Funds</b> account for the proceeds of specific revenue sources that are restricted or committed to expenditure for a specific purpose. The School Food Service Fund is an example of a Special Revenue Fund. |  |  |
|   | ects Funds account for financial resources to be used for the acquisition or construction lities and other capital assets.       |  |
|   | <b>Funds</b> account for the accumulation of resources for, and the payment of, general long-<br>ncipal and interest.            |  |
| <b>Permanent Funds</b> account for resources that are restricted to the extent that only earnings, not principal, may be used for purposes that benefit the government or its citizenry.  |  |  |
| Fiduciary Funds account for assets held by a governmental unit in a trustee or agent capacity.  |  |  |
| Agency Funds account for funds held purely in a custodial capacity.   |  |  |
| <b>Private-Purpose Trust Funds</b> account for all other trust arrangements under which principal and income benefit individuals, private organizations or other governments.   |  |  |
| Supplemental sch<br>current governme  | edules will be used in the ST-3 to account for non-current governmental assets and non-<br>ntal liabilities.                     |  |

| 4. Number of Funds |   |
|--------------------|---|
| Purpose            | Explains the criteria upon which the number of funds is determined  |
| Principle          | School districts should establish and maintain those funds required by law and sound financial administration. Only the minimum number of funds consistent with legal and operating requirements should be established because unnecessary funds result in inflexibility, undue complexity, and inefficient financial administration. |

| 5. Reporting Capital Assets |   |
|-----------------------------|---|
| Purpose                     | Clarifies requirements  |
| Principle                   | At the fund financial statement level, capital assets are not reported in governmental funds. Governmental fund capital assets will be accounted for and reported in the schedule of Non-Current Governmental Assets. |

| 6. Valuation of Capital Assets |   |
|--------------------------------|---|
| Purpose                        | Explains the requirements for recording capital assets  |
| Principle                      | Capital assets should be accounted for at historical (actual) cost or, if the cost is not practicably determinable, at estimated cost. The cost of the capital asset should include ancillary charges necessary to place the asset into use. Donated capital assets and capital assets acquired in a service concession arrangement should be recorded at acquisition value. Acquisition value is the price that would be paid to acquire an asset with equivalent service potential at the acquisition date, or the amount at which a liability could be liquidated with the counter party at the acquisition. |

| 7. Depreciation of Capital Assets (Fund Financial Statements) |   |
|---|---|
| Purpose   | Explains the purpose and basis for depreciation   |
| Principle   | Depreciation of capital assets should not be reported in the accounts of governmental funds. Accumulated depreciation may be recorded in the schedule of Non-Current Governmental Assets. |

| 8. Reporting Long-Term Liabilities |  |
|------------------------------------|--|
| Purpose                            | Clarifies requirements   |
| Principle                          | At the fund financial statement level, long-term liabilities are not reported in govern-<br>mental funds. Long-term liabilities will be accounted for and reported in the schedule<br>of Non-Current Governmental Liabilities. |

| 9. Measurement Focus and Basis of Accounting |  |
|--|--|
| Purpose                                      | Explains the accounting basis and its applicability to the various funds   |
| Principle                                    | For school districts, the modified accrual basis of accounting should be used in measuring financial position and operating results. |

Governmental fund revenues and expenditures should be recognized on the modified accrual basis. Revenues should be recognized in the accounting period in which they become available and measurable. Expenditures should be recognized in the accounting period in which the fund liability is incurred, if measurable.

Fiduciary funds revenue and expenses should be recognized on the accrual basis of accounting.

Transfers should be recognized in the accounting period in which the interfund receivable and payable arise.

<u>BOCES Settlements</u> - The amount of annual settlement (surplus or deficit) with BOCES shall be accrued on the books. A surplus will be recorded as a receivable (A440 Due from Other Governments) and credited to expenditures. A deficit will be recorded as an accrued liability (A601) and debited to expenditures.

<u>Tuition</u> - Amount due to a school district at the end of the fiscal year will be accrued if available to meet current commitments. If not available it will be recorded as a receivable (A440) and credited to A691 Deferred Inflow of Resources. Tuition due to other school districts will be charged to A522 Expenditures and credited to A631 Due to Other Governments

| 10. Budgeting, Budgetary Control and Budgetary Reporting                                    |   |  |
|---|---|--|
| Purpose Clarifies requirements for budgets and their relationship to the accounting records |   |  |
| Principle   | <ul> <li>An annual budget(s) should be adopted for every governmental unit.</li> <li>The accounting system should provide the basis for appropriate budgetary control.</li> </ul> |  |

In New York State, general statutory law requires political subdivisions to establish appropriations as a means of providing control over amounts that may be expended. In addition, revenues other than real property taxes must be estimated as a means of determining the amount of real property taxes to be levied. OSC requires budgets for funds classified as general, special revenue, capital projects and debt service. At a minimum, revenues must be controlled by source and expenditures by functional unit and basic object of expenditure. The books of accounts must establish budgetary control at the level of detail contained in the original budget and as modified by the governing board during the fiscal year. A school district should control expenditures for each budget line that it has established.

| 11. Transfers, Revenues and Expenditures Account Classification  |  |
|--|--|
| Purpose Identifies the accounting classifications of transactions  |  |
| Principle  | Interfund transfers and proceeds of general long-term debt issues should be classified separately from fund revenues and expenditures. |
| Governmental fund revenue should be classified by fund and source. Expenditures should be classified by fund, function (or program), organization unit, activity, character, and principal classes of objects. |  |

| 12. Common Terminology and Classification   |  |  |
|---|--|--|
| Purpose Provides the ability to compare planned and actual activities for all funds |  |  |
| Principle   | A common terminology and classification should be used consistently throughout the budget, the accounts, and the financial reports of each fund. |  |

| 13. Interim and Annual Financial Reports   |   |
|--|---|
| Purpose Clarifies financial reporting requirements   |   |
| Principle  | Appropriate interim financial statements and other pertinent information should be prepared to facilitate management control of financial operations, board of education oversight, and, where necessary or desired, for external reporting purposes. |
| School districts are required to submit a financial report, the ST-3, to the Office of the State Comptroller and the State Education Department. |   |

# **Chapter 3 - Measurement Focus and Basis of Accounting**

## **MEASUREMENT FOCUS**

Although school districts maintain their accounting records on a modified accrual basis of accounting, which measures the flow of current financial resources, they must convert this financial information to the accrual basis of accounting, which measures the flow of economic resources, when preparing the district-wide financial statements subject to an independent audit (see Chapter 7).

| ST-3 and Fund<br>Financial Statements   | District-Wide<br>Financial Statements   |
|---|---|
| Flow of current financial resources   | Flow of economic resources  |
| Are there more or less resources that can be<br>spent in the near future as a result of events<br>and transactions of the period? | Will the district be better or worse off<br>economically as a result of events and<br>transactions of the period? |
| Increase in spendable resources<br>- revenues or other financing sources  | Events and transactions that improve<br>economic position<br>- revenues or gains                                  |
| Decrease in spendable resources<br>- expenditures and other financing uses  | Events and transactions that diminish<br>economic position<br>- expenses or losses                                |

Situations which illustrate the difference between the two measurement focuses are as follows:

| 1. Receipt of long-term debt proceeds |                                |  |
|---------------------------------------|--------------------------------|--|
| ST-3 and Fund                         | District-Wide                  |  |
| Financial Statements                  | Financial Statements           |  |
| Increase in spendable resources       | Economic position not improved |  |
| DR Cash                               | DR Cash                        |  |
| CR Other Financing Sources            | CR Bonds Payable               |  |

| 2. Repayment of principal on long-term debt |                                  |  |
|---|----------------------------------|--|
| ST-3 and Fund                               | District-Wide                    |  |
| Financial Statements                        | Financial Statements             |  |
| Decrease in spendable resources             | Economic position not diminished |  |
| DR Expenditure                              | DR Bonds Payable                 |  |
| CR Cash                                     | CR Cash                          |  |

| 3. Capital acquisition          |                                  |  |
|---------------------------------|----------------------------------|--|
| ST-3 and Fund                   | District-Wide                    |  |
| Financial Statements            | Financial Statements             |  |
| Decrease in spendable resources | Economic position not diminished |  |
| DR Expenditure                  | DR Equipment                     |  |
| CR Cash                         | CR Cash                          |  |

| 4. Exhaustion of capital assets       |  |  |
|---------------------------------------|--|--|
| ST-3 and Fund<br>Financial Statements | District-Wide<br>Financial Statements                  |  |
| No effect on spendable resources      | Economic position diminished                           |  |
| Depreciation is not recognized        | DR Depreciation Expense<br>CR Accumulated Depreciation |  |

| 5. Deferrals and Amortization         |   |  |
|---------------------------------------|---|--|
| ST-3 and Fund<br>Financial Statements | District-Wide<br>Financial Statements                                     |  |
| Decrease in spendable resources       | Economic position diminished only by the expense for the benefited period |  |
| DR Expenditure                        |   |  |
| CR Cash                               | DR Deferred Outflow of Resources<br>CR Cash                               |  |
|                                       | DR Amortization Expense<br>CR Deferred Outflow of Resources               |  |
|                                       | (Expense allocated over entire period of benefit.)                        |  |

# **BASIS OF ACCOUNTING**

A school district's accounting basis determines when transactions and economic events are reflected in its financial statements.

#### **Modified Accrual Basis:**

Under the modified accrual basis of accounting, revenues and other financial resources are recognized when they become susceptible to accrual, that is when they become both measurable and available to finance expenditures of the current period. Each school district should adopt an availability period for all revenues, except real property taxes, which must have a 60 day availability period. Expenditures are recognized when the fund liability is incurred, with certain exceptions, such as principal and interest on long-term debt.

#### **Accrual Basis:**

Under the accrual basis of accounting, most transactions are recorded when they occur, regardless of when cash is received or disbursed.

| ST-3 and Fund  | District-Wide   |
|--|---|
| Financial Statements   | Financial Statements  |
| Cash flow must occur within a short-enough<br>period to affect current spendable resources.<br>Revenues must be both measurable and<br>available, and expenditures are generally<br>recognized when they are expected to draw<br>upon current spendable resources. | Revenue/gain or expense/loss recognized<br>when they occur regardless of cash flow. |

The following are examples to illustrate the effects of these differences:

| 1. Billing for services rendered  |   |  |
|---|---|--|
| ST-3 and Fund<br>Financial Statements   | District-Wide<br>Financial Statements   |  |
| DR Receivable<br>CR Revenue<br>CR Deferred Inflow of Resources  | DR Receivable<br>CR Revenue   |  |
| Only the amount available to finance liabilities of the current period would be recognized as revenues. | Entire revenue recognized in the period in<br>which service was provided. The timing of<br>collections is not relevant. |  |

| 2. Employees earn vacation leave that will be taken or paid out in the future   |  |  |
|---|--|--|
| ST-3 and Fund<br>Financial Statements   | District-Wide<br>Financial Statements                                  |  |
| No Expenditure<br>Leave would be recognized as an expenditure<br>to the extent it is expected to be liquidated<br>with current spendable resources. | DR Expense<br>CR Accrued Liability<br>The liability has been incurred. |  |

| EQUITY<br>The difference between assets and liabilities:                          |   |

| Fund Balance<br>Nonspendable<br>Restricted<br>Committed<br>Assigned<br>Unassigned | Net Assets<br>Invested in capital assets, net of related debt<br>Restricted<br>Unrestricted |

# **Chapter 4 - Funds and Supplemental Schedules**

The following funds and supplemental schedules are available for use by school districts. School districts should establish and maintain only the minimum number of funds consistent with legal and operating requirements (See Chapter 2, Principle 4).

## **Governmental Funds:**

General (A) - the principal operating fund and includes all operations not accounted for and reported in another fund.

#### **Budgetary Accounts**

Both the authorized financial plan, or budget, and the actual results realized during the fiscal year will be recorded. Accounts have been provided to record the budget and any modifications. The budgetary accounts are a self-balancing group of accounts. Control accounts will record the total of estimated revenues and the total amount authorized for expenditure (appropriations). Details of estimated revenues and appropriations will be maintained in subsidiary ledger accounts. An account has been provided which will show the amount of the fund balance appropriated to finance the current year's budget. Actual revenues and expenditures will not affect these accounts.

#### Proprietary Accounts

Accounts are provided to reflect the assets and liabilities of a district and display the results of operations in terms of revenue, expenditure and fund balance. Expenditures shall be maintained in a subsidiary ledger by functional unit and object and will reflect appropriations as modified, expenditures, encumbrances and unencumbered balances. Actual revenues shall be maintained in a subsidiary ledger which will also show the estimated revenues, and the balance to be realized.

**School Food Service Fund (C)** - a special revenue fund used to account for and report transactions of the school district breakfast, lunch and milk programs. Real property taxes levied to subsidize the programs can be recorded in the General Fund and transferred to the School Food Service Fund when needed or the taxes can be deposited directly into the School Food Service Fund (see example journal entry # 94 in Chapter 8). All direct expenses of the school breakfast, lunch and milk programs will be paid from this fund. Budgetary and encumbrance accounting are required. Surplus foods received from the Federal government shall be entered in the records at market value. At the end of the fiscal year, a physical inventory of food must be taken and the value recorded in the accounting records.

**Miscellaneous Special Revenue Fund (CM)** - a special revenue fund used to account for and report those revenues that are restricted or committed to expenditures for specified purposes.

**Special Aid Fund (F)** - a special revenue fund used to account for and report special projects or programs supported in whole or in part by Federal funds or State-funded grants. A grant is defined as a contribution of cash or other assets from the State to be used or expended for a specific purpose or activity as opposed to an entitlement which is an amount to which a school district is entitled pursuant to an allocation formula contained in specific statutes and regulations. Entitlements will continue to be accounted for in the General Fund. State grants which are to be accounted for in the Special Aid Fund are those which may possess the following characteristics:

- The program is funded in whole or in part through a distribution of State funds where allocations are made on some basis other than a formula basis.
- Payments of State assistance are usually made on a current basis (i.e., revenue is usually received in the same fiscal year in which expenditures are made). There are exceptions, such as summer handicapped aid.
- An application or budget must be filed with and approved by the State and/or Federal government as a requirement prior to receipt of the funds or a separate expenditure report is required at the completion of the program.
- The funds are required to be expended for a specified purpose.

Federal or State aid for special projects will be credited directly to this fund. The local share, if any, shall be provided for in the General Fund and transferred to the Special Aid Fund. Revenues from other sources shall also be credited directly to this fund. All revenues should be identified with a particular project.

**Public Library Fund (L)** - a special revenue fund used to account for and report transactions of a library established and supported, in whole or in part, by real property taxes. The use of this fund assures compliance with Education Law §259, which provides that all moneys received from taxes or other public sources for library purposes shall be kept in a separate fund. In addition to the tax and other public moneys, the library may receive gift and endowment funds. These funds will be accounted for in a permanent fund or private-purpose trust fund, as appropriate.

Library moneys appropriated for capital projects shall be transferred to the Capital Projects Fund and expended upon authorization of the library trustees. Capital projects financed from the proceeds of obligations will be under the control of the governing board of the school district.

Grant or contract payments by the school district to a free association library or to a public library sponsored by another local government will not be recorded in this fund but will be made directly from the General Fund.

For the purposes of financial reporting, a decision will have to be made as to whether or not the library meets the criteria for inclusion in the reporting entity.

**Permanent Fund (PN)** - used to account for and report resources that are legally restricted to the extent that earnings, not principal, may be used for purposes that benefit the school district.

**Capital Projects Fund (H)** - used to account for and report financial resources that are restricted, committed, or assigned to expenditure for the acquisition or construction of capital facilities and other capital assets, such as equipment. Capital projects funds must be used if the acquisition or construction is financed in whole or in part from the proceeds of obligations, but may include funding from Federal, State and local sources.

Since capital projects are budgeted on an individual project basis, and since legal and contractual requirements will vary from one project or class of projects to another, an individual Capital Projects Fund should be established for each authorized project, as defined by SED project number. There will be instances in which several related projects combined under a single budgetary and/or debt authorization may be accounted for in a single fund. A common example of this situation would be a series of building improvements carried out over an extended period of time by a school district with funds provided by a single bond authorization and issue. However, a combined balance sheet for all capital projects will be presented in the financial statements.

The Board of Education's authorization of specific capital projects is required prior to their commencement as a means of ensuring that all legal aspects of the project are in order and that financial commitments will be met. Certain other requirements must be met before capital projects can be undertaken. One of these is authorization to issue bonds when a part or all of the fund resources are to be provided by borrowings. Referendum requirements, if any, must also be complied with.

There will be many instances in which the General Fund or a Special Revenue Fund will budget and expend its own resources for a capital purpose. So long as the resources in such cases are derived exclusively from the direct revenues of the particular fund and do not involve borrowing, such outlays may properly be accounted for in the fund involved without a separate Capital Projects Fund.

The liability for long-term obligations issued to finance a project will not be recorded in the Capital Projects Funds, but will be accounted for in the Non-Current Governmental Liabilities account. This includes the proceeds of bonds and capital notes. Proceeds of State or Federal aid received after completion of the project, which is restricted to payment of debt service, will be recorded in the Debt Service Fund.

Capital assets acquired through a Capital Projects Fund will be accounted for in the Non-Current Governmental Assets account.

The means of financing and the estimated cost of a project will be recorded in memorandum accounts similar to the entry for recording the annual budget in the General Fund. These estimates will not be closed until the completion of the project and also will not appear in the balance sheet.

The balance of obligations, accrued interest on obligations, earnings on investments and bond premiums (if the premiums are not used for the capital project) will be transferred to an operating or debt service fund for debt service payments. **Debt Service Fund (V)** - used to account for and report the accumulation of resources that are restricted, committed, or assigned to expenditure for the payment of principal and interest on long-term debt. Debt service funds are required when segregation of resources is legally mandated, including:

- Proceeds from the sale of property on which debt is outstanding.
- Interest earned on the proceeds of long-term debt which was not budgeted as a source of financing for the project.
- Unexpended proceeds of long-term debt.

Taxes levied for debt service may be recorded directly in this fund or transferred from other funds. Unexpended balances of proceeds of borrowings for capital projects, interest and earnings from investing proceeds of obligations, and premium and accrued interest will be recorded here and held until appropriated for debt payments.

A single debt service fund will be maintained to account for and report the payment of longterm debt, however, subsidiary records should be maintained for individual debt issuances.

## **Fiduciary Funds:**

Agency Fund (TA) - accounts for assets held by a school district as an agent for individuals, private organizations or other governments and/or other funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

**Private-Purpose Trust Fund (TE) -** accounts for trust arrangements under which principal and income benefit individuals, private organizations or other governments. A scholarship is an example of a Private-Purpose Trust Fund.

## Supplemental Schedules:

**Non-Current Governmental Assets (K)** - accounts for capital assets of a school district not accounted for through fiduciary funds. Amounts are reported in the ST-3 Report in the Supplemental Schedule SS-4.

**Non-Current Governmental Liabilities (W)** - accounts for the unmatured general longterm debt and liabilities of a school district which are not recorded as a liability in another fund. Amounts are reported in the ST-3 Report in the Supplemental Schedule SS-2.

# **Chapter 5 - Classification and Coding Structure**

School districts in New York State are required to use a standard system for classifying and coding accounting transactions.

# **Classification:**

A classification of accounts is a systematic arrangement of accounts based upon a definite scheme. The purpose of classifying accounts is to provide a standard format for recording and reporting financial transactions which allows comparisons to be made with other school districts or other financial periods. The classification system serves many purposes: a basis for budgeting, accounting, and reporting; administrative control; accountability to the Office of the State Comptroller, State Education Department, and the general public; cost accounting; and the compilation of financial statistical data on the state level.

# Coding:

Coding of accounts facilitates the classification of data on source documents and the posting of entries in the accounting records. It enables identification of transactions quickly and provides consistency in reporting. The coding system used in New York State is an alphanumeric system - a letter or combination of letters followed by a series of digits.

The alpha portion of each code, consisting of one or two letters, identifies the fund. The following funds are provided for school districts in New York State:

| Fund                     | Alpha Code |
|--------------------------|------------|
| Governmental Funds:      |            |
| General                  | А          |
| Special Revenue Funds    |            |
| School Food Service Fund | С          |
| Miscellaneous Revenue    | СМ         |
| Special Aid Fund         | F          |
| Public Library           | L          |
| Capital Projects         | Н          |
| Permanent                | PN         |
| Debt Service             | V          |
| Fiduciary Funds:         |            |
| Agency                   | TA         |
| Private Purpose Trust    | TE         |

The numeric portion of each code, which immediately follows the alpha portion, identifies general ledger, revenue and expenditure/expense accounts. The same account code number, where applicable, is used in all funds.

**General ledger codes** have three digits and are arranged in balance sheet order; assets, followed by liabilities and fund equity.

| 100 - 499 | Assets      |
|-----------|-------------|
| 600 - 699 | Liabilities |
| 800 - 999 | Fund Equity |

For example 200 identifies the asset CASH in each fund. A200 identifies the asset CASH in the General Fund.

**Revenue codes** have four digits and are arranged by source (where did the revenue come from):

| 1000 - 2999 | Local Sources               |
|-------------|-----------------------------|
| 3000 - 3999 | State Sources               |
| 4000 - 4999 | Federal Sources             |
|             | Interfund Transfers         |
| 5000 - 5999 | and Proceeds of Obligations |

Each category is further subdivided to better identify the revenue source. For example 2401 identifies INTEREST AND EARNINGS in each fund.

GAAP requires revenues to be classified by fund and by source. Thus, General Fund INTEREST AND EARNINGS would be classified A2401.

**Expenditure codes** have a minimum of 5 digits and are arranged by functional unit and object of expenditure. The term function refers to the primary classification and description as to purpose (what was the purpose of the expenditure). The first four digits identify the function:

| 1000 - 1999 | General Support     |
|-------------|---------------------|
| 2000 - 2999 | Instruction         |
| 5000 - 5999 | Transportation      |
| 6000 - 8999 | Community Service   |
| 9000 - 9099 | Employee Benefits   |
| 9700 - 9799 | Debt Service        |
| 9900 - 9999 | Interfund Transfers |

Each function is further subdivided to better classify the expenditure. For example, expenditure code 1325 in the General Support function identifies the Treasurer's Office within the financial office of the school district.

Expenditures should be further classified by character, that is, on the basis of the fiscal period they are presumed to benefit. The major character classifications are: current, capital outlay and debt service. Character classifications may be accomplished by grouping the object classifications, discussed below, which are subdivisions of the character classification.

The object of the expenditure (the fifth digit in the code) is a secondary classification and identifies the item purchased or service obtained in order to carry out a function. The object is identified by the fifth and final digit:

| .1 | Personal Services            |
|----|------------------------------|
| .2 | Equipment and Capital Outlay |
| .4 | Contractual and Other        |
| .6 | Debt Service Principal       |
| .7 | Debt Service Interest        |
| .8 | Employee Benefits            |
| .9 | Interfund Transfer           |

Code 1325 from above can then be further classified as 1325.4 indicating Contractual Services within the Treasurer's Office.

GAAP requires expenditures to be classified by fund, function, character and object. Thus a General Fund expenditure for Contractual Services within the Treasurer's Office is coded A1325.4.

The coding of expenditures may be expanded to include more detail such as department, location and/ or activity accounting. This can be accomplished at the school district level by further expanding the object of expenditure code by adding additional digits. Coding available for use by school districts have specific expanded objects of expenditure depending on the fund, as follows:

| <b>General Fun</b>             | d  |  |
|--------------------------------|--|--|
| Basic Objects of Expenditure   |  |  |
| .10                            | Teacher Salaries, Pre-Kindergarten   |  |
| .11                            | Teacher Salaries, ½ Day Kindergarten   |  |
| .12                            | Teacher Salaries, K-6  |  |
| .13                            | Teacher Salaries, 7-12   |  |
| .14                            | Substitute Teacher Salaries  |  |
| .15                            | Instructional Salaries   |  |
| .16                            | Noninstructional Salaries  |  |
| .45                            | Materials and Supplies   |  |
| .471                           | Tuition Paid to Public Districts in NYS<br>(excluding Special Act Districts) |  |
| .472                           | Tuition - All Other  |  |
| .473                           | Payments to Charter Schools  |  |
| .48                            | Textbooks  |  |
| .49                            | BOCES Services   |  |
| Special Objects of Expenditure |  |  |
| 2610.46                        | School Library A/V Loan Program  |  |
| 2630.22                        | State-Aided Computer Hardware - Purchase                                     |  |
| 2630.46                        | State Aided Computer Software  |  |
| 5510.21                        | Purchase of Buses  |  |
| 9901.93                        | Transfer to School Food Service Fund   |  |
| 9901.95                        | Transfer to Special Aid Fund   |  |
| 9901.96                        | Transfer to Debt Service Fund  |  |
| School Food S                  | ervice Fund  |  |
| .16                            | Salaries   |  |
| .401                           | Management Company Admin Service Fee   |  |
| .402                           | Net Management Company Direct Expenses                                       |  |
| .409                           | All Other Contractual  |  |
| .41                            | Net Cost of Food Used  |  |
| Special Aid Fund               |  |  |
| .15                            | Instructional Salaries   |  |
| .16                            | Noninstructional Salaries  |  |
| .21                            | Purchase of Buses  |  |
| .45                            | Materials and Supplies   |  |

| Special Aid Fund (Continued)   |  |  |
|--------------------------------|--|--|
| .471                           | Tuition Paid to Public Districts in NYS (excluding |  |
|                                | Special Act Districts)                             |  |
| .472                           | Tuition - All Other                                |  |
| .473                           | Payments to Charter Schools                        |  |
| .48                            | Textbooks  |  |
| .49                            | BOCES Services                                     |  |
| Capital Fun                    | ds   |  |
| Basic Object                   | s of Expenditure                                   |  |
| .201                           | Superintendent of Construction or Clerk of Works   |  |
| .210                           | Buses  |  |
| .240                           | Contractual and Other (Including Architecture,     |  |
|                                | Legal, Engineering, and Insurance)                 |  |
| .291                           | Land   |  |
| .292                           | Buildings  |  |
| .293                           | General Construction (Including HVAC, Plumbing,    |  |
|                                | Electric, Site Improvement, and Utility Service)   |  |
| Special Objects of Expenditure |  |  |
| 2110.200                       | Regular School - Furniture, Equipment, Textbooks   |  |
| 1621.200                       | Maintenance of Plant                               |  |
| 9901.96                        | Transfer to Debt Service Fund                      |  |

Employee benefits, including such items as the school district's share of social security, retirement and various types of insurance, may be recorded in two ways. The first method would be to use the Employee Benefits Codes (9000-9099) with the .8 object of expenditure. The alternative method would be to charge the employee benefits to the various functional units using the .8 object of expenditure.

**Control account codes** are used to record the aggregate of debit and credit postings to a number of related accounts called subsidiary accounts. Control account codes have three digits. *Code 522 Expenditures* is used to record claims, vouchers and payrolls paid or accrued, including those of special reserves. *Code 980 Revenues* is used to record revenues, including those of special reserves.

# **Chapter 6 - Budgeting**

GASB has given authoritative guidance on the budget and budgetary accounting in Section 1700 of its Codification of Governmental Accounting and Financial Reporting Standards. The sources of this guidance are the National Council on Governmental Accounting (NCGA) Statement 1 and Interpretation 10, and GASB Statement 34.

NCGA Interpretation 10 (State and Local Government Budgetary Reporting) defines the appropriated budget as the expenditure authority created by the appropriation bills or ordinances that are signed into law and related estimated revenues, including all reserves, transfers, allocations, supplemental appropriations, and other legally authorized legislative and executive changes.

It sets forth the following statements of principle on budgeting and budgetary control:

- 1. An annual budget(s) should be adopted by every governmental unit.
- 2. The accounting system should provide the basis for appropriate budgetary control.
- 3. A common terminology and classification should be used consistently throughout the budget, the accounts and the financial reports of each fund or activity.

The budget is an essential ingredient in the financial planning, control and evaluation process of any government. Every governmental unit in New York State is either required to, or should, prepare an annual operating budget.

Simply stated, the budget is an estimated financial plan of a government which represents the spending authority for the various purposes of the government and the means of financing those proposed expenditures.

## Legal Level of Control

School district budget form SBM-1 represents the minimum level of legal budgetary compliance to be entered into the formal accounting system of a district.

# **Budgetary Integration**

Formal budgetary accounting is a management control technique used to assist in controlling expenditures and tracking revenues. Budgetary accounting techniques are important because the annual budget is a legal compliance standard against which the operations of government are evaluated.

Because statutory laws of the State of New York require staying within appropriated budgets, the accounting structure is designed to ensure and demonstrate compliance with the budget. To achieve this goal, appropriated budgets are integrated into the accounting system. "Integrating the budget" means the accounting system is specifically designed to provide ongoing and timely information on unrealized budgetary revenues, as well as remaining uncommitted balances of appropriations.

After their managerial control purpose has been served, during the year end closing process, the general ledger budgetary accounts are reversed. Therefore, the budgetary accounting process has no effect on the actual results of operations.

# Accounting for the Budget

The range and method of budgetary practices are outside the scope of financial reporting standards. However, budgetary compliance is a dominant consideration in managing governments. The basis on which the budget is prepared should be consistent with the measurement focus of the particular fund.

The system prescribed by OSC provides for the integration of the budget into the accounting records to provide for the control of authorized expenditures.

A journal entry will be made for the general ledger accounts only. The debits and credits must equal and remain within the self-balancing group of budgetary accounts. Those accounts are as follows:

- 510 Estimated Revenues
- 511 Appropriated Reserves
- 530 Obligations Authorized
- 599 Appropriated Fund Balance
- 960 Appropriations
- 962 Budgetary Provisions for Other Uses

The subsidiary revenue and expenditure accounts support the totals in the general ledger. The budget will be posted to the subsidiary accounts directly from the actual budget. The following illustrates the above:

|        |                               | Debit | Credit |
|--------|-------------------------------|-------|--------|
| 7/1/xx | 510 Estimated Revenues        | XXXX  |        |
|        | 599 Appropriated Fund Balance | XXXX  |        |
|        | 960 Appropriations            |       | XXXX   |

#### To record the adopted budget

Throughout the year the general ledger control account, "Appropriations" and the subsidiary appropriation accounts are used to control expenditures, keeping them within the authorized spending authority of the budget. The general ledger control account "Estimated Revenues" is used to record and summarize aggregated estimated revenues to ensure that revenues to support the appropriations are received, or on track to be received. Analysis of these accounts on a continuing basis will enable the budget officer to determine when the budget will have to be modified because original appropriations are insufficient or estimated revenues will not materialize.

## Encumbrances

Encumbrances are informally defined as "an appropriation that's spoken for." They are commitments related to unperformed executory contracts for goods or services. The encumbrance account does not represent a GAAP expenditure, only a commitment to expend resources. Likewise, the account, "Reserve for Encumbrances," is not synonymous with a liability account since the liability is recognized only when the goods are received or the services are performed.

The use of encumbrance accounting as a continuous and integral part of the accounting system enhances budgetary control. In a formal encumbrance system, each appropriation account should show the amount appropriated, the amount encumbered, the amount expended, and the unencumbered balance. The principal purpose of this requirement is to guard against the creation of liabilities in excess of the appropriations approved by the governing board. To record encumbrances, the account code to use is *521 Encumbrances*.

Before a purchase order or similar document is released to a supplier or contractor, it should be approved by the purchasing agent indicating the availability of appropriations. A copy should be filed with the purchasing agent and also with the unit initiating the order. If an appropriation balance is available, the chief fiscal officer will enter the encumbrance against the proper appropriation account. In those instances where a proposed commitment exceeds the available balance, the encumbrance should not be entered and the purchase order should be returned to the originating unit until such time as appropriate action is taken to amend the budget.

At the end of the fiscal year, the account 521 Encumbrances is closed to account 912 Unrestricted Fund Balance, and then allocated among the appropriate fund balance categories of restricted, committed or assigned for financial reporting purposes (districts may use the appropriate reporting codes directly for budgeting, accounting and reporting purposes). This serves to constrain fund balance for the potential liability of goods and services ordered. On the first day of the next fiscal year, the entry closing the encumbrance account (and subsequent allocation among fund balance) is reversed and the budget for the subsequent year is increased in a like amount to provide for the potential expenditures authorized in the previous year.

## **Budget Transfers and Supplemental Appropriations**

<u>Transfers</u> – The school district is bound by limitation on budgetary transfers, whether operating under a contingent budget or passed budget.

- 1. Under any budget, transfers can only be made between contingent codes or from noncontingent to contingent codes. Transfers can never be made from contingent areas to non-contingent areas of budgets nor between non-contingent areas of the budget. Noncontingent expenditure codes cannot be increased absent voter authorization (which includes new equipment and subsidization of the school food service operations).
- 2. If operating under a contingent budget, a district is also bound by budget caps. SED maintains information on contingency budget caps at their website at <u>www.p12.nysed.</u> <u>gov/mgtserv/budgeting</u>. When operating under a contingent budget, a school district must be able to maintain an internal budgetary control system that allows for the sustained monitoring of appropriations and spending.

<u>Supplemental Appropriations</u> – The school district is limited in its ability to adjust its total spending subsequent to authorization.

- 1. No board may incur a liability in excess of the amount appropriated by a district meeting unless such board is specially authorized by law to incur such liability.
- 2. Generally, a school district cannot increase appropriations solely on the basis of the receipt of additional revenue. However, grants in aid received from the State or Federal government, gifts which are required to be spent for particular objects or purposes and insurance proceeds received for the loss, theft, damage or destruction of real or personal property, when proposed to be used or applied to repair or replace such property, may be appropriated by resolution of the board at any time for such objects or purposes.

# **Budgetary Reporting**

<u>Budget Status Report</u> – The treasurer is required to render a report to the Board of Education at least quarterly (monthly in the event that a budget transfer has been made since the last report), for each fund including, at a minimum, the revenue and appropriation accounts required in the Annual School Budget form. This report should be presented to the Board of Education on a monthly basis (according to sections 2117(1) and 2122(6) of the New York State Education Law and section 170.2(p) of the Regulations of the Commissioner of Education), and include, at a minimum, the status of these accounts in at least the following detail:

<u>Revenue Accounts</u> Estimated revenues Amounts received to date of report Revenues estimated to be received during balance of fiscal year Overages and deficiencies

<u>Appropriation Accounts</u> Original appropriations Transfers and adjustments Revised appropriations Expenditures to date Outstanding encumbrances Unencumbered balances

# **Chapter 7 - Financial Reporting**

Governmental accounting is concerned with the collection and analysis of a government's finances. This information has very little value if it cannot be communicated in a timely and effective manner. Financial reporting serves as the link between a school district's financial information and the school district's numerous, varied users they are designed to serve. Some of these users include school boards and oversight bodies, investors, creditors, taxpayers, the State Education Department (SED) and OSC.

# **Internal Reporting**

Internal reporting typically is designed to accomplish two goals:

- To allow management to monitor compliance with legal and contractual provisions applicable to the management of public funds.
- To provide management with information on current performance that it needs to make future financial plans.

Because internal reports are designed expressly to serve the needs of management, management is free to select whatever format or content it believes most relevant. Interim reports usually are prepared on the budgetary basis and often do not include statements reporting general capital assets or general long-term debt. It is highly unusual for internal reports to be prepared in accordance with GAAP.

# **External Reporting**

# Annual Financial Report – ST-3

GML Section 30 requires every school district to annually make a report of its financial condition to the State Comptroller. School districts meet this requirement with the filing of their annual financial report (ST-3) with SED and OSC via the State Aid Management System (SAMS). The requirements for financial reporting prescribed in this manual are the basis for the ST-3.

The ST-3 includes fund financial statements, which are reported substantially in compliance with GAAP, and supplemental schedules, which are designed to meet specific needs of SED and OSC. Updates to the ST-3 are communicated by SED and are available on their website at https://stateaid. nysed.gov/st3/.

# **Audited Financial Statements**

Section 2116-a of the New York State Education Law and Section 170.2(r) of the Regulations of the Commissioner of Education require each school district employing eight or more teachers to obtain an annual audit of its records by an independent Certified Public Accountant or an independent Public Accountant. All audits should be conducted in accordance with generally accepted auditing standards (GAAS) issued by the AICPA, and Government Auditing Standards (GAGAS), issued by the Comptroller General of the United States. A copy of the independently prepared audit report,

along with any written response to the report, must be filed with SED and OSC. The audited financial statements will include management's discussion and analysis (MD&A), basic financial statements, (which includes government-wide financial statements, fund financial statements, and notes to the financial statements), and other required supplementary information.

#### Management's Discussion and Analysis (MD&A)

Financial managers of governments are knowledgeable about transactions, events and conditions that are reflected in a government's financial report and of the fiscal policies that govern its operations. These financial managers will share their insights in a required MD&A which will precede the basic financial statements. The MD&A will give readers an objective and easily readable analysis of the government's overall financial performance for the year. The MD&A will also provide an analysis of the government's overall financial position and results of the previous year's operations to assist the user of the statements in assessing whether the government's financial results and budgetary information and describe capital asset and long-term debt activity during the year. The MD&A will conclude with a description of currently known facts or conditions that are expected to have a significant effect on the government's future financial position and operations.

#### District-Wide Financial Statements

The district-wide financial statements will be prepared using the economic resources measurement focus and the full accrual basis of accounting and include a statement of net assets and a statement of activities. Fiduciary activities will be excluded from the district-wide statements.

The statement of net assets should report all financial and capital resources, including capital assets and infrastructure, net of depreciation, and all liabilities, including long-term liabilities. The difference between a government's assets and its liabilities are its net assets.

The statement of activities should be presented in a format that reports net revenues (expenses) of its individual functions. An objective of this format is to report the relative financial burden of each of the reporting government's functions. General revenues, including property taxes, contributions, special and extraordinary items and transfers will be reported separately after the total net expenses of the government's functions, ultimately arriving at the changes in net assets for the period.

#### Fund Financial Statements

Fund-based financial reporting in the basic financial statements focuses on major individual funds. Each major fund is reported individually. Data for all non-major governmental funds will be aggregated into a single "other" column. The district's general fund will always be reported as a major fund. Other governmental funds should be reported as major funds based on the following criteria:

- 1. Total assets, liabilities, revenues or expenditures of the individual governmental fund are at least 10 percent of the corresponding total (assets, liabilities, revenues or expenditures) for all funds of that category, and
- 2. Total assets, liabilities, revenues or expenditures of the individual governmental fund are at least 5 percent of the corresponding total (assets, liabilities, revenues or expenditures) for all governmental funds combined.

In addition, any governmental fund that district officials believe is particularly important to the financial statement's user may be reported as a major fund.

Financial statements for governmental funds should be presented using the current financial resources measurement focus and the modified accrual basis of accounting and include a balance sheet and statement of revenues, expenditures and changes in fund balance. These are the same statements contained in the ST-3.

Districts will also be required to present a summary reconciliation to the district-wide financial statements.

#### Notes to the Financial Statements

The notes to the financial statements should communicate information essential for fair presentation of the basic financial statements that is not displayed on the face of the financial statements. As such, the notes form an integral part of the basic financial statements.

Disclosure in the notes is needed only when the information required to be disclosed is not displayed on the face of the financial statements. The notes should not be cluttered with unnecessary and immaterial disclosures. Attendant circumstances and materiality must be considered in assessing the propriety of the notes to the financial statements disclosures. Notes to the financial statements provide necessary disclosure of material items, the omission of which would cause the financial statements to be misleading.

#### Other Required Supplementary Information

Required supplementary information consists of schedules, statistical data, and other information that the GASB has determined are an essential part of financial reporting and should be presented with, but are not part of, the basic financial statements of a district. Other required supplementary information may include budgetary comparison schedules, information about the modified approach for reporting infrastructure assets, and the other postemployment benefits funding progress.

For additional information on audits of financial statements of school districts, please see the SED's Audit Reference Manual on their website at www.p12.nysed.gov/mgtserv/accounting/ referencemanual/.

## **Federal Single Audits**

The Federal Single Audit Act as amended requires school districts who expend \$750,000 or more in a year in Federal awards to have a Single Audit conducted in accordance with OMB Circular A-133. The audit report issued in conjunction with Circular A-133 generally must be submitted to the federal government, SED, and OSC within the earlier of 30 days after receipt of the report, or nine months after the end of the audit period. Corrective action plans for the major program findings for federal programs must be submitted with the audit report and corrective action plans for the financial statement findings must be submitted within 90 days of receipt of the audit report.

# **Chapter 8 - Sample Journal Entries**

This chapter presents sample journal entries for school districts. Some entries, such as the opening and closing entries, may happen behind the scenes in your financial software program and would not have to be entered by the district. These samples do not represent all possible journal entries. If you are unable to find the necessary sample journal entry, contact the regional office that serves your local government for assistance.

|                                    |      | A2401 Interest and Earnings | \$250          |          |          |  |  |  |  |

#### RESERVES

NOTE: See entries #2b and #2c for budgeting entries to fund a reserve and to appropriate a reserve in the budget. In addition, reserve revenue and expenditure entries are closed to the applicable reserve fund balance at year-end. Some school districts may choose to designate reserve accounts with the AR designation. See entries #81 and #82 for closing entries.

#### 49a

 To increase funds in the Reserve for Employee Benefit Accrued Liability using fund balance during the year or at fiscal year end:

 Debit
 Credit

 A912
 Unrestricted Fund Balance
 \$50,000

 A867
 Reserve for Employee Benefit
 \$50,000

 A867
 Reserve for Employee Benefit
 \$50,000

 NOTE: A912 Unrestricted Fund Balance is used for budgeting and accounting only, not for reporting purposes. It will be allocated to A913 Committed, A915 Assigned or A917 Unassigned Fund Balances for reporting purposes, as appropriate. Districts may use A913, A915 or A917 directly for budgeting and accounting purposes instead of A912.

 To allocate inventory to the appropriate classification of fund balance (Consumption Method):

 Method):
 Debit
 Credit

 A912
 Unrestricted Fund Balance
 \$850

 A806
 Not in Spendable Form - Inventory
 \$850

NOTE: To record the closing of encumbrances at the end of fiscal year refer to entry #39.

# SCHOOL FOOD SERVICE FUND

NOTE: Many journal entries for School Food Service Fund transactions are similar to those shown in the General Fund. For transactions not illustrated here, refer to the General Fund Journal Entries. The entries in this section related to inventory assume the consumption method of reporting inventory. For the purchases method, see General Fund entry #75.

# SPECIAL AID FUND

The entries below illustrate the transactions for a NCLB (No Child Left Behind) Title I Basic Grant financed by Federal funds and assumes that the project extends over multiple fiscal years. The accounting treatment for projects financed by State funds or partly by Federal funds or State funds and partly by local money will be the same. When applicable, the local share will be accounted for as a General Fund interfund transfer and recorded under revenue code F5031 Interfund Transfers. All revenues should be identified with a particular project. As is the case with capital projects, each individual grant should be accounted for separately.

NOTE: Many journal entries for Special Aid Fund transactions are similar to those shown in the General Fund. For transactions not illustrated here, refer to the General Fund Journal Entries.

#### 107

 Closing entries would be similar to the entries in the General Fund, see entries #81-86. The following entry would occur in the next fiscal year to record the unused appropriations authorized in the previous fiscal year:

 Debit
 Credit

 F510
 Estimated Revenues

 (Original 2,000,000 - Received 1,900,000)
 \$100,000

 F960
 Appropriations

 (Original 2,000,000 - Spent 1,900,000)
 \$100,000

#### CAPITAL PROJECTS FUND

Note: Many journal entries for Capital Projects Fund transactions are similar to those shown in the General Fund. For transactions not illustrated here, refer to the General Fund Journal Entries.
