About the Audit Reports in This Listing

The Comptroller is the chief financial officer of New York State and the administrative head of the Office of the State Comptroller, an office established by the State Constitution.

As a statewide-elected official, the Comptroller is directly accountable to the taxpayers and voters of the State. Consequently, the Office of the State Comptroller is not an agency of the Executive or the Legislature, but rather of the people. This relationship makes the activities of the Office of the State Comptroller directly responsive to public concerns in a very immediate sense: the public interest is the standard that determines all the Comptroller's policies.

An essential characteristic of the Office of the State Comptroller is its independence. This independence pertains especially to the Comptroller's role as State auditor. It is the Comptroller who scrutinizes and reports on how State money is spent.

The Comptroller's audits are central to the sound management of State government. By monitoring State operations and identifying opportunities to improve accountability and enhance productivity, the Comptroller not only fulfills a responsibility to oversee the fiscal management of the State, but also provides the Legislative and Executive branches with an independent and objective view of how State government can operate more efficiently and effectively. By making audit reports available to the public, the Comptroller also provides citizens with an unbiased perspective on the workings of their State government.

Most New York State government operations are supervised by a network of State agencies and public authorities. These organizations are audited by the Division of State Government Accountability in the Office of the State Comptroller. The audits are conducted in accordance with applicable professional standards and guidelines, including those promulgated by the American Institute of Certified Public Accountants and the Comptroller General of the United States.

The findings and recommendations resulting from each audit are published in a formal report, which is designed to include constructive criticism and suggestions for change. State agency and public authority officials are given the opportunity to respond to a confidential draft report to ensure that the observations are accurate and the conclusions are appropriate. The comments of these officials are carefully considered in preparing the final audit report, which is distributed to various State officials and the public. Agency heads are required by law to report to the Governor, the Comptroller, and the Legislature within 180 days after receiving final audit reports to explain how and when they plan to implement the audit recommendations or to take alternative corrective action.

This listing includes all final audit reports related to State agency and public authority operations issued during the five-year period from October 1, 2017 through September 30, 2022 and is a companion to the 2022–2023 Annual Report on Audits. All reports are available at www.osc.ny.gov.
